R Markdown

```
bankdata <-read_csv2("https://www4.stat.ncsu.edu/~online/datasets/bankData.txt", show_col_types = FALSE
  rename("Subscription" = y) %>%
    filter(age < 75, marital != "unknown")
```

```
## i Using "','" as decimal and "'.'" as grouping mark. Use `read_delim()` for more control.
```

```
p1 <-ggplot(data = bankdata, aes(x = duration)) +
    geom_density(aes(group = loan) ) +
      xlim(0, 1500)
```
